This championship is very competitive and I am happy for the result. It was a great team effort."

The second final saw **Stan Pex** coming to the fore dominating Race-2 after a recovery run started from P9, but **Flavio Camponeschi** has also been superb after a contact with Daniel Stell early on. **Camponeschi** lost a few places but then made up for the lost time climbing back to P3, engaging a battle for second with **Jorrit Pex**. **Stan Pex's comment:** "We did a good job in Race-2, while everybody chose to put on new tyres in the first final I went for the old ones. We won Race-2, so I think it was a good choice. I had a good start from P9, I got some positions back and then I passed the others, built a bit of a gap and it was easier in the end. I am happy for my brother Jorrit, he also run a good race, and scored some good points with two second places, but I am happier for my win! It was good racing especially in the front, high level, a lot of fans. We are very happy about this first race of DKM."
